

Delegate Biographical Information and Key Note Abstracts

Professor Corrado Paganelli

Corrado Paganelli DDS, MD is currently chair of the Board of IFDEA (International Federation of Dental Educators and Associations) and FEHDD (Forum of European Heads and Deans of Dental Schools), Former President CECDO (Council of European Chief Dental Officers) and ADEE (Association for Dental Education in Europe). Dean of dental school / clinic, and previously hygienist school and orthodontic program, Erasmus coordinator for medical school at University of Brescia – Italy. President-elect of IADR Nutrition group. He also chairs the dental expert panel (Expamed) for the EU Commission of the Regulation (EU) 2017/745 on Medical Devices. Professor Paganelli has also

been the convivial host of the many Innovations in Education Colloquiums held at Brescia for over the past 20 years.

Professor Stylianos Hatzipanagos

Professor Stylianos Hatzipanagos is a Fellow at the Centre for Online and Distance Education at the University of London. He is a member of the council at NCUP (National Conference of University Professors) and he also teaches on the UK Open University's Computing and IT project. His work focuses on the strategic use of digital technologies in higher education, with particular expertise in AI in learning and teaching, assessment innovation, online and distance education, and doctoral and postgraduate provision. He has held leadership roles across research-led and modern universities in hybrid, online, and distance learning settings. His research includes learning design, formative and digital assessment, academic integrity,

digital literacies, collaborative learning, and the use of emerging technologies to enhance student engagement, inclusion, and academic practice. He has published extensively in peer-reviewed journals and books and has led or contributed to UK and international research projects on digital competence, lifelong learning, professional development, and e-learning.

Dr Nicolas Giraudeau

Dr Nicolas Giraudeau is a dentist, academic and public health specialist at the University Hospital and University of Montpellier, France. His work focuses on digital oral health and its potential to improve prevention, access to care and health equity, particularly for underserved and vulnerable populations. He founded and coordinates e-DENT, a pioneering teledentistry programme, and leads the "Montpellier Santé Orale" programme. As a digital oral health expert for the World Health Organization, he contributed to

the development of the WHO–ITU mOralHealth initiative. Holding doctorates in dental surgery and health law, he combines clinical, public health, technological and regulatory perspectives

Dr. Peter Fritz

Dr. Peter Fritz, B.Sc., D.D.S., F.R.C.D.(C), Ph.D (Perio),
M.B.A., LL.M., LL.M.

Dr. Peter Fritz is a certified specialist in periodontics and founder of an innovative periodontal practice in Fonthill, Ontario, with clinical expertise spanning dental implant treatment, hard and soft tissue reconstruction, and the interdisciplinary advancement of long-term periodontal wellness. Since 2005, he has lectured internationally and presented research at leading dental and scientific conferences worldwide, earning recognition across both clinical and academic spheres. Beyond clinical practice, Dr. Fritz brings a unique multidisciplinary perspective to dentistry: he holds an MBA from Northwestern University, dual law degrees from the University of Toronto, and is currently pursuing his fourth master's degree, in blockchain, cybersecurity, and artificial intelligence, at IMD in Lausanne, Switzerland. He chairs the Committee on Artificial Intelligence and Emerging Digital Technology for the Royal College of Dentists of Canada, serves as an AI consultant to several provincial dental regulatory bodies, and holds academic appointments at five universities, embodying his guiding principle: "Never stop learning, because the world around you never stops teaching."

Professor Kenneth Anthony Eaton

Ken Eaton is currently a Visiting Professor at the University of Portsmouth and an Honorary Professor at the University of Kent. He is also Advisor to the Council of European Chief Dental Officers and a Honorary Member of the European Association of Dental Public Health (EADPH). He is a past President of EADPH and of the Education Research and Practice Research Groups of the International Association for Dental Research. He was the first President of the Platform for Better Oral Health in Europe and has been the president of the IADR Education Research and Practice-Based Research Groups. From 1990 to 2002 he was a Senior Civil Servant at the Department of Health (England) and in 2007 was a Specialist Adviser to the House of Commons Select Committee's inquiry into the NHS General Dental Services in England. He is listed by the General Dental Council as a Specialist in Periodontics and Dental Public Health.

Dharmesh Chauhan

Dharmesh Chauhan currently holds the position of Lead Data Analyst in the Corporate Data Warehouse team at Argus Media over the past 4 years and has over 15 years of experience in Business Intelligence. His expertise encompasses a broad spectrum of data-related fields, including advanced data visualization and semantic data modelling. A lifelong learner and educator, Dharmesh is passionate about continuously upgrading his skills and knowledge and passing that knowledge on to those that are passionate about data. He has recently embraced QuickSight Analytics and AI features as his primary business intelligence tool at Argus, reflecting his adaptability and commitment to staying at the forefront of data

analytics technology

Professor Dieter Schonwetter

Dieter, a product of diverse heritage, born to German and Paraguayan immigrants in the vibrant landscape of Canada, found his roots along the Frazer and Assinboine rivers. His transformative journey at the Dr. Gerald Niznick College of Dentistry commenced in 2004, propelling him from an Education Specialist to the esteemed position of Director of Student Affairs and Academic Services. In 2018, Dieter's unwavering commitment to education earned him the prestigious Association of Canadian Faculties of Dentistry

National Teaching Award. His exceptional contributions extend beyond the classroom, as reflected in his stellar research portfolio, encompassing four international and eight national awards, as well

as securing 48 research grants.

A beacon of guidance in academia, Dieter has mentored 16 graduate and 9 BSc students, leaving an indelible mark on their educational journey. His scholarly impact extends to over 60 publications, including a noteworthy book. Dieter's influence reaches international audiences through 15 keynote addresses and nearly 200 peer-reviewed conference presentations. With a global perspective, he has conducted 200+ professional development workshops across 12 countries, fostering educational excellence.

Outside the academic realm, Dieter's passions are diverse. An advocate for innovative teaching technology, he is equally dedicated to understanding and preserving Indigenous culture. A nature enthusiast at heart, weekends find him immersed in the pursuit of wildlife photography, sharing captivating stories of unexpected encounters and unique discoveries.

Dieter's indomitable spirit is further showcased in his cold-weather biking, inspired by his encounters with gypsies in Germany. His global adventures, shared with family, attest to his accomplished world-traveller status. Beyond accolades and accomplishments, Dieter's zest for learning, dedication to teaching, and appreciation for diverse cultures define his dynamic persona.

Dr. Aristomenis I. Syngelakis

Dr. Aristomenis Syngelakis is the President of the Council of European Chief Dental Officers. From December 2020 to February 2025 he was the Chief Dental Officer of the Hellenic Republic. He was unanimously elected as President – Elect of CECDO in Montpellier, September 2022. In November 2024 participated in the first – ever WHO Global Oral health Meeting in Bangkok, Thailand. He is a WHO special advisor. He holds a Degree in Dentistry, a Degree in Political & Administration Sciences, a M.Sc. in Health Management, a M.Sc. in Community Dentistry (Dental Public Health), and a Ph.D. in Dental Public Health. He is a Scientific

Collaborator at the School of Dentistry, European University Cyprus; teaching staff at the Faculty of Dentistry, University of Athens; Scientific Collaborator at the Faculty of Medicine, University of Thessaly and teaching staff at the M.Sc. Program in Public Health at the same University. His research and academic fields include, among other, Dental Public Health, Health Systems and Oral Health Policy, Dental Ethics, History of Dentistry.

Professor Margaret Cox,

Professor Margaret Cox is Emerita Professor of IT in Education at King's College London (based in both the Faculty of Dentistry, Oral and Craniofacial sciences (FODOCS), and the School of Education Communication and Society (ECS)). She was awarded an OBE in 2001 for outstanding contributions to IT in education, appointed as Fellow of the Institute of Physics in May 2003, and lifelong fellow of ITTE, NAACE and Mirandanet. In 2011, Margaret was appointed a fellow of Kings College London for exceptional services to the college. Researching and developing the uses of new technologies in education since the 1970s and the use of

haptic simulators in Health Care Education since 2007, she has been a regular contributor to the Brescia/King's College London Colloquia since the first one in 2001. She is past President of the National Conference of University Professors (NCUP) which has helped to encourage young researchers to present their research at Brescia colloquia in recent years through the NCUP sponsorship scheme. Margaret is an international expert in the role of technology in education, its impact on teaching and learning and on policy and practice. This includes being

a founder member of the International Steering Committee for Edusummit, sponsored by many governments and UNESCO, which brings together leading researchers, policy makers and practitioners in the field of IT in education. Its purpose is to assist researchers and governments to build on past evidence to forge the future for IT in Education. Margaret has been a regular consultant to various governments over more than 40 years and is currently a member of the Kortext Academic Advisory Board and Honorary Professor at the Dental Academy, University of Portsmouth

Dr Stephen Deboo

Stephen is a Senior Clinical Lecturer in Restorative Dentistry and Undergraduate Programme Director for the BDS and BSc programmes at the University of Liverpool School of Dentistry. He graduated in Dentistry from Newcastle University and spent several years in general dental practice before developing a career in dental education.

He has extensive experience in undergraduate and postgraduate dental education, having previously taught at the University of Manchester before joining the University of Liverpool in 2019. His current role involves the leadership of undergraduate programmes within the School of Dentistry, undergraduate lead for prosthodontics and endodontics training, student clinical supervision and OSCE assessment lead. He has also played a significant role in developing the use of digital dentistry, simulation and haptic technologies within the undergraduate curriculum.

Stephen is an experienced dental examiner and is Deputy Lead Examiner for the UK Overseas Registration Examination (ORE), alongside his role as an examiner for the Licence in Dental Surgery (LDS) examination.

His principal academic interests are in clinical education research, particularly simulation-based training, haptically enabled technologies and digital dental education. His wider interests include supporting the transition from simulation to clinical practice, developing student confidence and engagement, and encouraging undergraduate research.

Stephen holds a Master's degree in Academic Practice (MAAP), Senior Fellowship in Higher Education (SFHEA), Fellowship of the Faculty of Dental Trainers (RCSEd), Membership of the Joint Dental Faculties (MJDF), and postgraduate qualifications in restorative dentistry.

Dr. Chantal Burgess

Dr Chantal Burgess *BSc (Hons), BDS (Hons), MFDS RCPS (Glasg), Implants Cert, PGCert Dent Ed (Dist)* is a London-based dental surgeon working across general dentistry, oral surgery and implant dentistry. Alongside clinical practice in NHS & Private Dentistry, she works as an Associate Specialist in Oral Surgery at hospitals in Chelsea & Westminster NHS Trust. Chantal has recently completed a Postgraduate Certificate in Dental Education at the University of Kent, graduating with Distinction, and has a particular interest in the teaching and development of psychomotor skills. A lifelong origami

enthusiast, she has combined this personal interest with dental education research to explore how manual dexterity may be observed, practised and refined.

Dr Ann-Marie Brennan

Dr Anne-Maria Brennan is Senior Lecturer (Associate Professor) in Professional Practice at the Kent Business School, University of Kent, UK and is Course Director of the MSc in Advanced & Specialist Healthcare and MSc in Professional Practice courses.

An alumnus of University of York, Imperial College and University of Wales, with teaching diplomas from both Trinity College and the Royal Academy of Music, Anne-Maria's specialism is in the role of andragogy in professional practice. With research interests in public engagement with science, particularly the interface between science, technology, culture and the arts she is author of five books. Sr Brennan is also a specialist in forensic biology, in particular the investigation of wildlife crime and is a core wildlife crime inspector

for the UK government.

Dr Brennan is Chair of the Botanical Research Fund and winner of the British Science Association's Sir Walter Bodmer Award. She is a Freeman of the City of London and also a Freeman and Liveryman of the Worshipful Company of Educators.

Saturday Roundtable Lead Presenter

Professor Barry Quinn

Professor Barry F.A. Quinn, Chair in Restorative Dentistry & Dental Education, Academic Lead & Head for Restorative Dentistry, University of Liverpool, School of Dentistry & King James IV Professor of the Royal College of Surgeons of Edinburgh. Barry was awarded a National Teaching Fellowship in 2023 recognising his pioneering and unique contribution to dental education, only the 12th dental recipient in 23 years of the scheme.

Barry is presently Secretary General of the Association Dental Education in Europe (ADEE), president of the Royal Society of Medicine, Section of Odontology (2024), immediate past president of the British Alliance for Researchers in Dental Education and Scholarship (BARDES), president of the Dental Teachers of Professionalism in the UK (2022) and a past-president of the Education Research Group (ERG) of the International Association of Dental Research (2018-2020) and metropolitan branch past president of the British Dental Association (2017). He is also a Dental Council elected member for the Faculty of Dental Surgery at the Royal College of Surgeons of Edinburgh. In 2017, Barry was the main lead for the "Shaping the Future of Dental Education" world workshop held at King's College London. At the University of Liverpool, Barry leads the integrated teaching of restorative dentistry for the collaborative learning core for the interprofessional education of dental and dental therapy students. Barry is a past recipient of the ADEE mature educators award (2013) and

interprofessional educators award (2016) and the American Dental Education Association (ADEA) emerging leaders (2021).

Barry's main research has included interprofessional education, haptic virtual reality surgical skills education and he completed a PhD in this area at King's College London. He has been fortunate to win many UK and international awards, such as the Medical Futures award (2011), British Education Technology & Trade Awards for "Innovation in Education" with his colleagues in the hapTEL team and in 2020 a King's Civic Challenge award working with the Borough food cooperative as well as being the lead on the Henry Schein Practice Green awards for campus initiatives in 2023. Barry has published over 190 refereed publications, conference papers and abstracts

Abstracts for Keynotes speeches and roundtable discussions

Professor Stylianos Hatzipanagos

Student Perspectives on GenAI and the Future of Assessment

This session explores how generative AI (GenAI) is reshaping student engagement with assessment in higher education, with a focus on academic integrity and sustainable practice. Drawing on three complementary studies, (1) a longitudinal analysis of assessment in distance learning (2020–2025), (2) research on academic integrity, and (3) a project examining GenAI integration, it presents student perspectives on AI use and its implications for assessment.

Findings show that students are already embedding AI into their study practices, influencing how they engage with assessment, understand academic integrity, and define learning and achievement. While AI-enabled tools create opportunities for more timely, personalised, and scalable assessment, they also raise challenges around integrity, equity, and student expectations.

The session highlights the need for practitioners to rethink assessment practice to ensure it remains meaningful and inclusive in AI-rich environments. It concludes with practical considerations for designing assessment approaches that align with evolving student practices and current priorities in higher education.

Dr Nicolas Girardeau

Innovation and digitalization in oral public health

Public oral health is constantly evolving and innovating. The advent of digital technologies several decades ago opened up new possibilities and also led to the development of new tools for improving public oral health. It remains important to recognize that technological innovations are no more significant than organizational innovations, which, incidentally, are more difficult to gain acceptance for.

In this presentation, we will discuss how digital health can be used as a public health tool. We will draw on the WHO's mOralHealth program as well as other examples from various countries.

Dr Peter Fritz

Artificial Intelligence in Dentistry: Foundations for Ethical and Effective Practice

“Moving forward to new educational realities in the digital era” was the theme of the last EdusumMIT2023 which brings together leading international researchers, practitioners and key policy makers every two years to review the knowledge and practices of IT in Education across the world in order to keep countries up to date on the role, scope and impact of IT in Education. This lecture is a reflection on the immediate shift to and adaptation of online technology during COVID-19 since March 2020 and an analysis of the way this has affected education and training. It draws on the decades of research outcomes and practical experiences before this radical change. Before COVID-19, researchers, practitioners and policy makers have been working for decades to integrate technology in education and training with different rates of successes. There were new ways that educational communities took on the pandemic challenge around the world and questions such as “Where do we go from here?”, “In what ways do we go back to prior practices?”, and “In what ways do we change and evolve?” emerging. In this era of rapid technological advancement, lessons can be learnt from previous successes, barriers, enablers to help us enhance and advance education and training and embrace new educational realities.

Mr Dharmesh Chauhan and Professor Kenneth A. Eaton

The use of AI to check manuscripts prior to their submission to scientific journals

This presentation will describe how authors of scientific papers could use AI to check their manuscripts prior to submitting them to scientific journals. It will provide an example and detail how Python was used to check and correct the manuscript. It is important to note that in this example AI has only been used to check the structure of the manuscript and not the methods used, results obtained, conclusions reached.

Dr. Stephen Deboo

Better Together? Exploring the Complementary Roles of Haptic Mixed Reality and Phantom-Head Simulation in Endodontic Training

Background: Haptically-enabled mixed reality (MR) simulation offers repeated practice, real-time feedback and enhanced visualisation within pre-clinical dental education. Emerging evidence supports its use as an adjunct to conventional phantom-head (PH) simulation, with each modality offering distinct educational benefits.

Aim: To explore the impact of a customised haptic MR endodontic exercise on undergraduate students’ technical performance and learning experience compared with conventional PH simulation.

Methods: Eighty-one third-year dental students were randomised to undertake initial endodontic access cavity training using either PH simulation (n=41) or haptic MR simulation (n=40). All subsequently completed standardised physical upper central incisor (UL1) and upper first molar (UL6) test teeth access cavity preparations. Outcomes included blinded expert grading, percentage tooth mass loss, completion time and student perceptions.

Results: PH-first students achieved significantly higher grades for UL1 ($p=0.034$), although no significant difference was identified for UL6 ($p=0.066$), tooth tissue removal or completion time. Haptics-first students showed a trend towards more conservative preparation and greater consistency for UL6. Students valued the repeatability, visualisation and immediate feedback provided by haptic simulation, with 75% reporting increased confidence.

Conclusion: Haptic MR and PH simulation appear to offer different but complementary educational benefits. Rather than replacing conventional simulation, haptics may provide a valuable feedback-rich environment to support confidence and skill development alongside PH training.

Dr. Chantal Burgess

Dentistry in Bloom: Can Origami Help Us Assess and Develop Manual Dexterity?

Manual dexterity is fundamental to clinical dentistry, yet its assessment and development remain challenging within dental education. This presentation explores origami as a simple, low-cost psychomotor task through which fine motor control, bimanual coordination, spatial awareness, sequencing, precision and error recognition can be observed and practised.

Drawing on current dental education literature, the presentation considers the mixed evidence for dexterity testing as a predictor of dental performance, alongside stronger evidence that psychomotor ability can improve through structured practice, repetition and feedback. It also considers the potential additional value of origami as an engaging, low-stakes activity with emerging links to wellbeing.

Rather than asking only who begins with “good hands”, this presentation focuses on how we can create simple, effective opportunities to develop them.

Professor Dieter Schonwetter

Round up of the day's themes and thoughts going forward to Saturday's roundtable session

The Brescia Organising Team

Artists in Residence

Dr. Jenny Wright

Jenny completed her PhD at the University of the Arts London where she explored the role of drawing and drawing like activities within the field of medicine and medical education. Her work focussed on the haptic nature of surgery and observation of head, neck and ophthalmic anatomy. She used information from the EYESi ophthalmic simulator at Moorfields hospital London, where she was artist in residence and data from the HapTEL system at Kings' College London Faculty of Dentistry, Oral and Craniofacial Sciences. Her ongoing research builds on her personal drawing practice, integrating observational drawings with images and videos of microscopic cell samples with a particular focus on breast cancer and the evolution of scar tissue.

Jenny continues to work with artists and medics as part of the UK Drawing Research Network delivering talks online and publishing work with colleagues involved in biomedical visualisation. Her most recent work examines the growth of cells and was included in an international show of drawing in the Napa Gallery in Lapland.

Nigel Fleet

Nigel fleet obtained a BA (hons) at St Martins College (University of the Arts London) and has taught and lectured in Fine Art, Film and Photography since 1982. He has also taught in France, living for five years in Normandy, and as a result speaks French fluently. He continues to work collaboratively with colleagues giving lectures on 19th and 20th century film makers and photographers. He is a keen musician and cyclist. For his most recent photographic practice he has recorded lost and discarded objects which form accidental street art in areas of South East London and Northern European towns and cities. These images he then selects for publications on ephemera and 'objets trouvés'.

Dr. Caroline Pankhurst

Dr Caroline Pankhurst graduated in dentistry from University College London Dental School and completed her training for entry onto the specialist list in oral microbiology. She was formerly a Clinical Senior Lecturer in Oral Microbiology at King's College London Dental Institute. She has published extensively in the fields of oral medicine, oral microbiology, and management of dental unit waterlines including two books on infection control namely "Control of Infection Guidelines for General Dental Practice " & "Basic Guide to Prevention and Infection Control in Dentistry". She is actively involved in postgraduate dental education and was a finalist in the e- Learning Awards 2012. She served two terms on the SAC in Medical Microbiology, Royal College of Pathologists. Caroline was a member of Editorial Boards of

“Primary Dental Care” & BMC Oral Health, and is a past President of the BDA Metropolitan Branch. She served two terms as an elected member on the BDA Central Committee for Dental Academic Staff & is a Council member of the BDA Metropolitan Branch. She is a Trustee of two medical charities the Fungal Infection Trust and the Affordable Health Care Initiative

Grateful thanks also to **Professor Pat Reynolds** for her invaluable support and organising expertise

Also thanks goes to the continuing support from the NCUP
<http://www.ncup.org.uk/>

We also remember with gratitude the support and encouragement of our friends Dr. Nigel Carter and Professor Terence Davis who have contributed so much in the worlds of education and oral health and to the Anglo Italian colloquium.

Dr Nigel Carter OBE
1952 - 2026

Professor Terence Davis OBE
1930 -2026
